

Panel Title: Urban Mobility in Europe: Example of France (Organized by MEGEVH French Network on HEVs)

Friday, September 9, 2011, 10:45 AM – 12:00 Noon

Panel Moderator: Dr. Alain Bouscayrol, University Lille1, MEGEVH

Panelists:

- Dr. Alain Bouscayrol, University Lille1, MEGEVH
- Dr. Daniel Hissel, University of France Comté, MEGEVH
- Dr. Rochdi Trigui, IFSTTAR, MEGEVH

Panel Summary: The development of a clean urban mobility is a key issue in the transportation challenge of the next decades for different reasons. First, the transportation sector is a major contributor to the GHG increase and, thus, the global warming. Moreover, the future oil depletion requires an important change in the automotive market. In addition, more and more people are concentrated in large cities. In Europe, several programs aim to develop new mobility uses and to insert more cleaner vehicles taking into account the important common transportation networks, but also the strong constraints of old European cities. After the presentation of French policies and constraints, the discussion will focus on the different ways to develop a real clean urban mobility.
